

NexTraq ELD solution is now certified by FMCSA

ATLANTA, GA., October 9, 2017 – NexTraq, a leading provider of GPS fleet and mobile workforce management solutions, announced that their ELD solution has been certified by the Federal Motor Carrier Safety Administration (FMCSA). The company's electronic logging device (ELD), NexTraq Elogs, is now listed on the FMCSA website.

NexTraq Elogs provides an integrated driver monitoring system to enable fleet managers to easily manage driver hours (HOS) compliance; DVIR inspections and helps businesses improve their fleet efficiency.

"At NexTraq, we believe in quality and ease-of-use. We have meticulously analyzed and designed our solution to meet FMCSA requirements, while keeping the consumer's everyday usability in mind," said Pankaj Sharma, VP of Marketing at NexTraq.

"We decided to go with a hardwired, ruggedized tablet solution, because of the possible connectivity, reliability and security issues associated with Bluetooth and Wi-Fi based solutions. By offering a robust, all-inclusive solution, we eliminate the hassle that the consumers have to face in purchasing devices, tablets and data plans," Sharma added.

Key features of NexTraq Elogs, the company's ELD solution, include:

- Hardware, tablet, wiring, and installation at one simple affordable price
- User-friendly dashboard
- Supports all required US and Canada driver types
- Delivers real time HOS updates to driver and manager
- Ruggedized, high resolution tablets specially designed for hours of service reporting
- Simple-to-use and easy-to-record inspection data with integrated electronic DVIR
- Automated collection of movement, speed, location and odometer readings from ECM
- Integrated NexTraq fleet management solution offering fleet tracking, fuel management, maintenance alerts, reporting and more

About NexTraq
